

MILFORD WINS BRONZE MEDAL DESIGNATION

Congratulations Millers!! Over the past few years we have made a focused effort to increase the rigor of our academic program and to ensure that all students were being served. Last year our goal was to make it onto one of the local or nationally recognized high school ranking reports. I am proud to report that for the first time in history, Milford Mill Academy has made it onto the U.S. News and World Report's Best High School Roster. Milford Mill is among 6 BCPS high schools to receive a Bronze Medal designation. Bronze Medals are awarded to schools that are recognized as high performing based on state exam performance and graduation rate. This means that Milford is currently outperforming schools similar to ours on state exams and our graduation rate is also higher than those schools. Bronze Medal schools are recognized by U.S. News and World Report, but they are not included in the numerical ranking. We are so proud of all of our students, faculty and staff!! I encourage all students to continue to strive for excellence. Take those AP courses and those AP exams. Ask for help if you need it. Earn those service learning hours. Let's go for the GOLD!!
